

## **Accentus Medical Continuing Service During COVID19 Pandemic**

**Oxford, 6 April 2020** ... Accentus Medical is implementing a business continuity plan and remains well prepared to continue to work effectively during the COVID19 pandemic, to assist and support our global customer base during this forthcoming difficult time.

We recognise the importance of maintaining supply of our biocompatible coating and antimicrobial surface treatment services to our customers as the impact of the virus unfolds. We have a robust continuity plan, enabling us to offer you an uninterrupted service while maintaining the health and safety of our employees, customers, partners and the community.

There is a core team assigned to process incoming production orders supported by essential support staff in the office, with allowance for social distancing.

Take Care and Stay Safe.

### **About Accentus Medical**

Accentus Medical is a global leader in delivery of innovative, silver-based anti-microbial surface treatments and biocompatible coatings on implantable medical devices. The company combines a long history of expertise in surface technologies, with dedicated research and development of new technologies for the medical device industry. Based at the historic Harwell Campus, Accentus Medical has provided expertise in surface technologies to the orthopaedic device industry since the 1970s, serving major orthopaedic and medical device manufacturers worldwide.

The company has two principal technology platforms: Agluna® silver anti-microbial surface treatment for prevention and control of post-operative infection, and Acusure® plasma spray coating for improving biocompatibility and durability of implants. These technologies are supplied to customers at Accentus Medical's ISO13485:2012 and ISO9001:2008 accredited facility.

Accentus Medical is also very well known for the medical device testing programmes offered by its in-house test laboratories. Manufacturers have been utilising test results provided by the company for many years as part of device homologation files all over the world.
